

RX-50

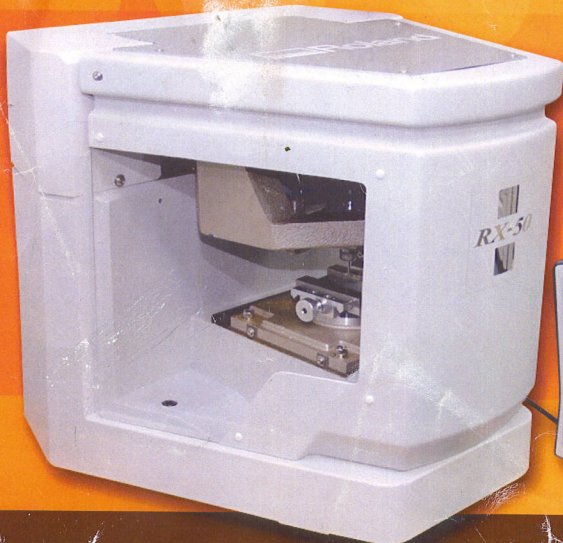

UNIQUE SPIRAL AXIS ENGRAVER

Now you can produce a custom, 3D medallion with precision text and graphics in minutes. Roland's innovative dual-motion technology employs a rotating worktable in conjunction with a high-speed spindle to produce 3D reliefs.

With the RX-50, you can create medallions, coins, promotional items, awards and personalized gifts in less than half the time of conventional engravers. The RX-50 operates quickly and quietly, making it ideal for mall kiosks and jewelry shops.

Features:

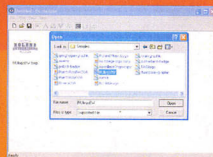

- Engraves gold, platinum, silver, titanium, brass, aluminum, acrylic and PVC
- Max. work area: 2" diameter
- Quiet operation
- High-speed spindle with up to 50,000 RPM for precision engraving
- Easy-to-use software included
- USB port for fast and easy setup
- Ideal for kiosks -- engrave 3D objects in only 5 minutes!
- Compact footprint easily fits on a small desk or tabletop
